Create UDF (User Defined Functions) in Apache Pig and execute it in MapReduce / HDFS mode

Aim:

To create UDF in Apache Pig and execute it in MapReduce/HDFS mode.

Procedure:

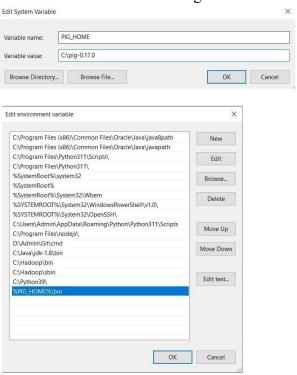

Pig Download and installation:

1. Download Pig:

Download Pig from "https://downloads.apache.org/pig/pig-0.17.0/"

2. Add the environment variable for Pig:

3. Go to C:\pig-0.16.0\bin and open pig (Windows Command Script)

set HADOOP_BIN_PATH=%HADOOP_HOME%\libexec

4. Open Windows Powershell and type "pig –x local" and check whether pig grunt appears.

Pig is successfully installed.

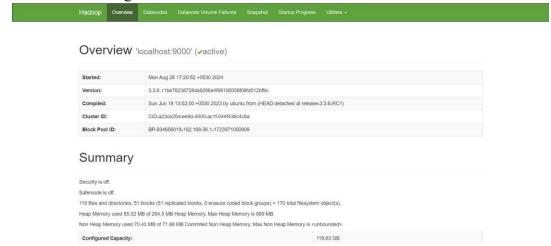

Create UDF:

1. Start Hadoop services:

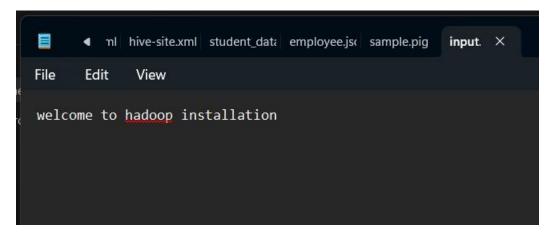

Open command prompt as an administrator

start-dfs.cmd startyarn.cmd

2. Open the browser and go to the URL "localhost:9870"

3. Create a text file "input.txt":

4. Create a Python file "uppercase udf.py":

```
importase_udf-Notepad
File Edit Format View Help
def uppercase(text):
    return text.upper()

if __name__ == "__main__":
    import sys
    for line in sys.stdin:
        line = line.strip()
        result = uppercase(line)
        print(result)
```

6.Create a Directory in HDFS and copy the Input File to HDFS

Hadoop fs -mkdir /piginput

hadoop fs -put udfs C:\pig\sample.pig /piginput

```
C:\hadoop\sbin>Hadoop fs -mkdir /piginput
mkdir: `/piginput': File exists
C:\hadoop\sbin>_
```

5. Create pig file "sample.pig":

```
File Edit View

-- Register the Jython standalone JAR using the correct URI format REGISTER 'file:///C:/jython-standalone-2.7.4.jar';

-- Register the Python UDF script REGISTER 'C:/pig/my_udf.py' USING jython AS myudfs;

-- Load the input file from HDFS data = LOAD 'hdfs://localhost:9000/piginput/input.txt' AS (line: chararray);

-- Apply the UDF to convert each line to uppercase uppercased_data = FOREACH data GENERATE myudfs.to_upper(line);

-- Store the result in HDFS STORE uppercased_data INTO 'hdfs://localhost:9000/pigOutput/output.txt';
```

6. Execute Pig file:

pig -f C:\pig\sample.pig

```
C:\hadoop\sbin>pig -f C:\pig\sample.pig

7. View the Output hdfs dfs -ls /pigOutput

```
C:\hadoop\sbin>hdfs dfs -ls /pigOutput
